

SAVE THE DATE!

Připravuje se aktivní účast pověřených expertů TP UVZ na:

WssTP annual Brokerage and WssTP Working Groups event (26-27 November in Brussels).

The main objective of the Brokerage event is to facilitate networking between our members for collaborative projects, as well as to foster the creation of consortia for the upcoming Horizon 2020 calls and other EU funding opportunities.

The brokerage part of the programme will be organised jointly with our partner ERRIN (European Regional Research and Innovation Network), underlining the strategic importance that WssTP gives to the role of regional actors and SMEs in European research and innovation related to water. In the programme, we will also make the link with our partner European Technology Platforms that represent industrial sectors for which water is a key concern. The second day will be dedicated to the WssTP WGs which will present their current activities.

Speakers from the European Commission, the Enterprise Europe Network, the National Contact points will be brought together to explain to WssTP and ERRIN members the lessons and experiences learnt from the 2014 calls. In addition to this, evaluators will share their experiences, by presenting their own point of view. Interested participants will have the chance to give short presentations on new project ideas. Our brokerage event is an opportunity to find the partners and expertise you are looking for your projects!
